

How to publish a web application to webhost

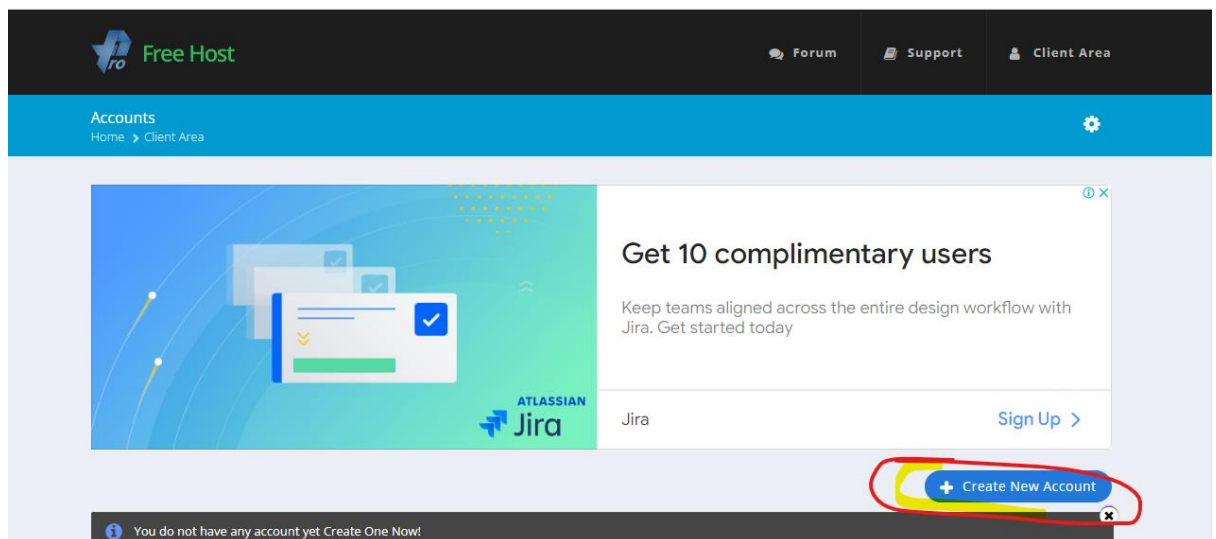

(Example with ProFreehost)

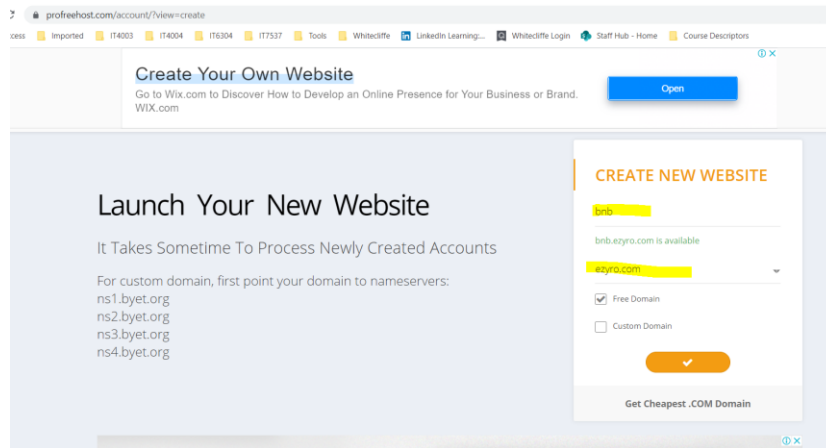

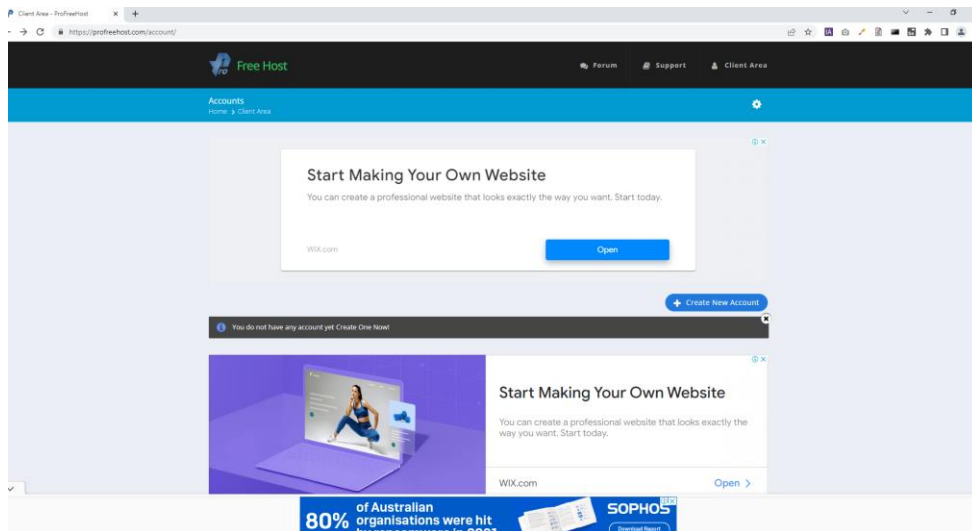

<https://profreehost.com/login/>

1. Create a ProFreehost account

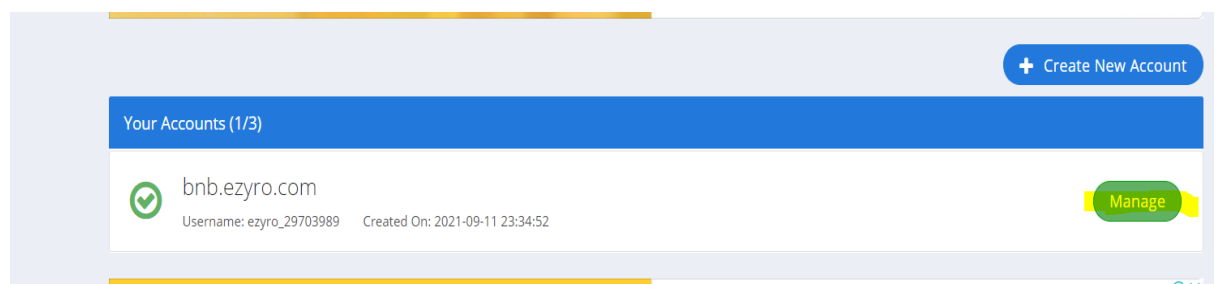

2. Activate your account
3. Login to ProFreehost
4. Create a new website (which is the domain)

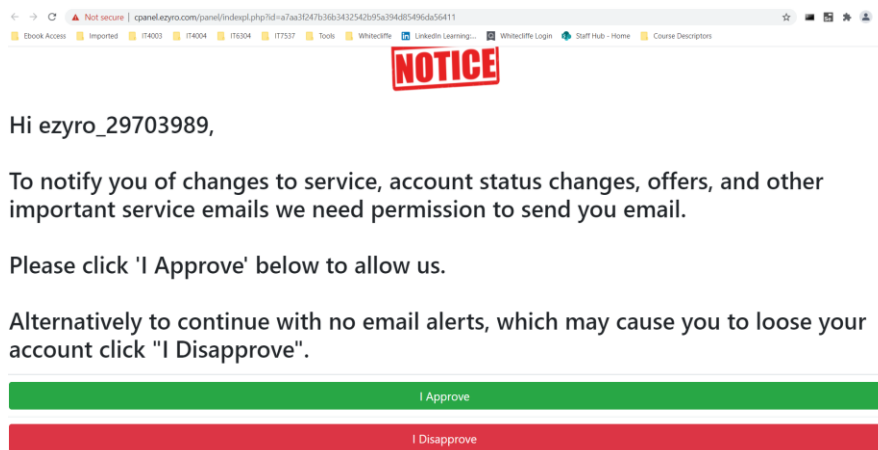

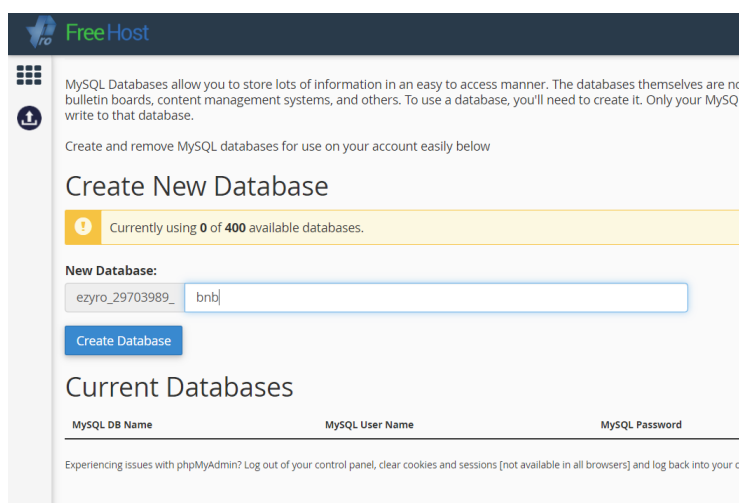

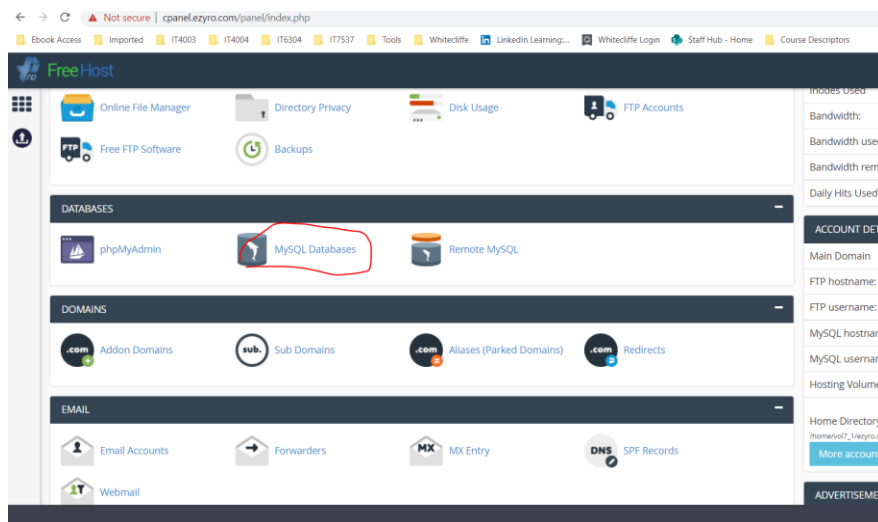

5. Click on “Manage” to access the control panel

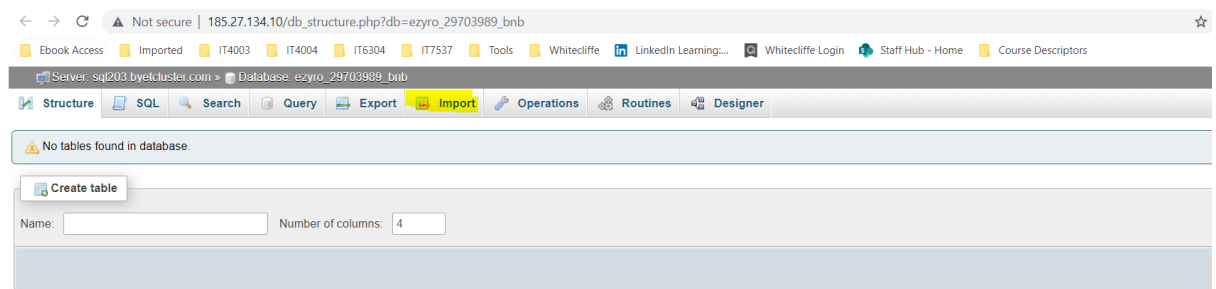

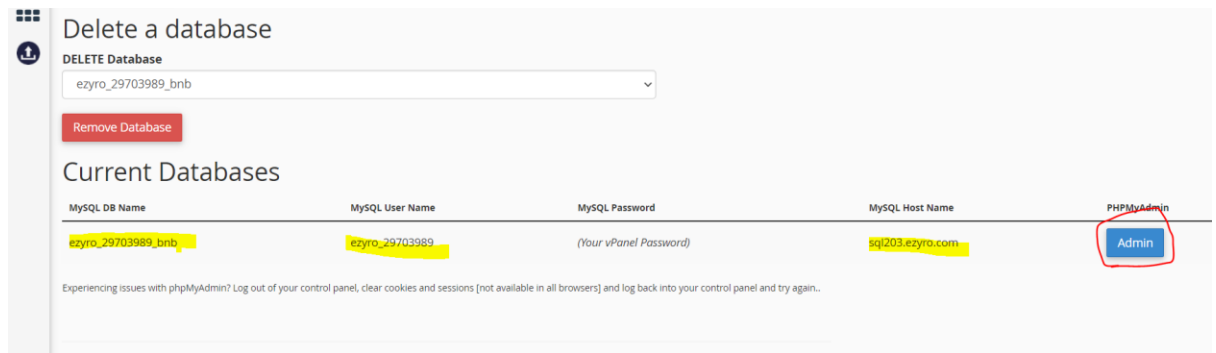

6. Click on “Control Panel” and click on the “I Approve’ button (Only requested once)

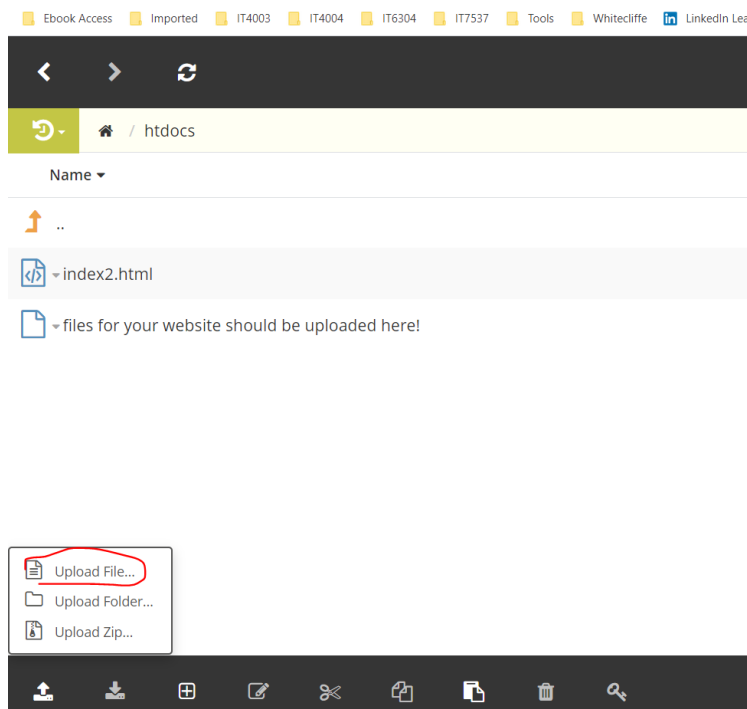

7. Create a database by clicking on “MySQL Databases”

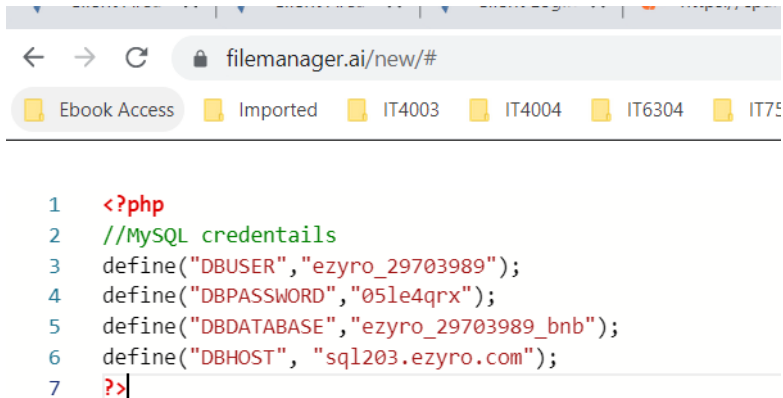

8. Click on “Admin” to import the data file

9. Back to Control Panel to click on the “Online File Manager” >> “htdocs”, upload your website

10. Configure "config.php" file

```
1 <?php
2 //MySQL credentials
3 define("DBUSER","ezyro_29703989");
4 define("DBPASSWORD","051e4qrx");
5 define("DBDATABASE","ezyro_29703989_bnb");
6 define("DBHOST", "sql203.ezyro.com");
7 ?>
```

11. Configure "checksession.php" file

```
function checkUser(){
    $_SESSION['URI'] = '';
    if($_SESSION['loggedin'] ==1)

    return TRUE;

    else{
        $_SESSION['URI'] = 'http://rhoville.unaux.com/' . $_SERVER['REQUEST_URI'];
        header(('Location:/booktickets/login.php'),true, 303);
    }
}
```

```

function login($id, $username){

    if($_SESSION['loggedin'] == 0 and !empty($_SESSION['URI'])){
        $uri = $_SESSION['URI'];
    }
    else{
        $_SESSION['URI'] = '/booktickets/ticketslisting.php';
        $uri = $_SESSION['URI'];
    }

    header('Location: /booktickets/ticketslisting.php', true, 303);

    $_SESSION['loggedin']=1;
    $_SESSION['userid']=$id;
    $_SESSION['username']=$username;
    $_SESSION['URI']='';
}

function logout(){
    $_SESSION['loggedin']= 0;
    $_SESSION['userid']= -1;
    $_SESSION['username']= '';
    $_SESSION['URI']='';
    header('Location:/booktickets/login.php', true, 303);
}

```

12. Open your URL to access your website
